Astrology

ASTROLOGY IS NOT WHAT YOU SEE IN THE PAPERS - IT'S MORE THAN JUST YOUR SUN SIGN AND, WHEN COMBINED WITH PSYCHIC INSIGHT, IT IS PROBABLY THE MOST POWERFUL READING YOU WILL EVER HAVE.

If you've never had your real birth chart analysed by a competent professional astrologer, you may have missed the chance to get 100% out of life. However, you can now enjoy a professional astrological telephone reading from one of the Circle's specialist astrologers.

We all have a place in the world and a part to play, yet it's amazing how many of us go through life trying to be what we are not, because we are responding to the pressures of society, our families or a mistaken belief that life is an endurance test and not something to be enjoyed.

There are 7 essential parts to a good astrology reading. Check out whether they have been covered in past readings. If you're thinking of having a prepaid credit card astrology reading, the following is what you can expect to get out of it.

Character and Personality Assessment

A competent astrologer will look at all the planets in your chart and figure how each can play a useful part in your life. So often we feel out of control because we don't fully understand our own apparently conflicting thoughts and feelings. Chart analysis helps you to be in harmony with yourself, rather than being pulled this way and that. It is about knowing your full potential and how to utilise it for maximum success.

Love and Relationships

Do relationships fall apart or do you have difficulty finding them in the first place? Who is your ideal companion and why? Is it possible that you need different partners at different stages of your life and, if so, why? When are you likely to find the partner of your dreams?

Career

The average person spends up to 15 years at work, or about a fifth of your life. This is a big chunk, so if you're not enjoying it you may need a change of direction. A good astrologer will see all the possibilities.

Health

Some are ultra cautious and worry about all sorts of things unnecessarily. Astrology reveals your health strengths and weaknesses and why it is that sometimes you're a bundle of energy and other times you can't be bothered to get out of a comfy chair.

Money

Did you know there is a potential source of good fortune for everyone? We are not all going to win national lotteries, so it's good to know what is best for you - but by all means keep dreaming and buy that lottery ticket because most of us have astrological cycles of good fortune and if you play at the right time, who knows?

Friends and Family

You can choose your friends, but do you know why you get on well with some people and not others? It's much harder to choose your family, but if things aren't right it's nice to know what could be done to make the most of the situation. At least you'll know where you stand!

Destiny

This is perhaps the most important part of an astrological reading and it's the aspect of life that astrology is best at. What's happening in your life right now? Are you doing things which are bound to fail, or do you know the secret of putting your efforts into those parts of life which are currently likely to succeed, if only you knew what they were and when to make your move?

Astrology teaches you the art of timing. If this is a time to make career moves and you're bogged down in love issues you are likely to fail at both. If you know when the astrology is right for working on a particular area of life and you go with the flow, your future could be transformed for the better.
